

# 2017 RETROCOMMISSIONING STUDY

## Preliminary Screening

Please provide the following information:

Customer/Tenant Name (as it appears on SPU bill)		SPU Electric Account Number	
Project Address	City	State	Zip Code
Contact Person/Title	Phone	Email Address	
Type of Facility	Square Footage	Number of Floors	
Heat Source: <input type="checkbox"/> Ground Source Heat Pump <input type="checkbox"/> Air Source Heat Pump <input type="checkbox"/> Electric Resistance Heat <input type="checkbox"/> Gas Heat (Boiler/Forced Air)			
Is your system currently controlled by an Energy Management System (EMS) or Direct Digital Controls (DDC) with a PC or laptop interface?			
<input type="checkbox"/> Yes <input type="checkbox"/> No			

If you answered "yes" to any of the above questions, please briefly describe what's happening at your facility, including expansions, major renovations, etc.:

If more space is necessary, please attach a separate sheet.

### Is Retrocommissioning Right for You?

Retrocommissioning is appropriate for most buildings, but there are key indicators that can help determine facilities for which retrocommissioning will be most cost-effective. Factors to consider are the age and condition of the building and its equipment, utility costs, and existing comfort problems.

The following facilities are ideal candidates for retrocommissioning:

- » Food processing
- » Electronics manufacturing
- » Diversified products
- » Metal fabricators
- » Hospitals and clinics
- » Correctional facilities
- » Large office buildings
- » Schools
- » Apartment buildings
- » Grocery stores
- » Large retail

Rebate funds are limited. SPU does not guarantee rebate availability. Rebate authorization number is required.
